

A New Age In Canopy Awnings Is Here.

The Sunbrero Retractable Awning

The retractable Sunbrero affords you the rare advantage of having both elegance and beauty along with the convenient function of blocking the sun or the rain.

The Sunbrero is available in three different models: rectangular, round, or elongated dome. Within each model you have a choice of two, three, four or five ribs, which will give you a totally different look and price range within each model. The Sunbrero frame is made from durable corrosion free nylon parts and extruded aluminum with a beautiful clear anodized or brown finish.

Functional Elegance

Add new life and equity to your home with "functionally elegant" Sunbrero awnings for your windows and doors.

Keep Your View

Unlike blinds, drapes, sunscreens and window films, the Sunbrero retractable awning blocks only the elements, not your view, allowing you continuous enjoyment of your beautiful outside surroundings. And you can still let the cool breeze blow through your home while keeping the sun or rain out.

Shading America's Homes Since 1981

Designer Fabrics Galore!

Choose from over 200 Solid or Striped fabrics. All fabrics are solution-dyed acrylic fabrics - specifically designed for outdoor use on The Sunbrero™. All fabrics are warranted for 5 years! Each fabric cover is custom made by Sunesta® after you select the colors and patterns. All cover hems and valance pattern edges are cut and sealed ultrasonically as well as sewn with lockstitch sewing machines to prevent unraveling. The Sunbrero™ threads are also coated with a wax-like UHAV protection to prevent them from deteriorating in extreme ultraviolet sunlight conditions.

Important Operating & Cautionary Information. Please keep in mind that all Sunesta® awnings are designed primarily for sun protection. They are not designed to withstand high winds or more than light rain - especially on shallow pitch installations where rain may collect on the fabric. During those times, the awning must be fully retracted to prevent damage not covered by the warranty. While virtually no maintenance is required, you may wish to wipe the frame and fabric periodically using a soft cloth with plain water or mild soap and reseal with a water repellent.

Retain Room Brightness

Sunbrero awnings give you total control of the glass area under them and room brightness of the space behind them. On cloudy days your Sunbrero can be easily retracted giving much brighter and cheerier living environment. Permanent awnings, sunscreens and window tinting films, can create gloomy rooms when they are not needed.

Protect Your Investment

Constant and direct summer exposure to ultraviolet rays damages and fades your valuable doors, carpets, drape furnishings. With a Sunbrero awning it is easy to block and protect your property from the damaging ultraviolet

Save Money Naturally

In the hot summer months you can extend your awning block the sun before it ever hits your window. Your room will be cooler and air conditioning costs will be dramatically

In the cold winter months you can retract your awning to let the sun naturally help heat your home and save on heating

In snowy and stormy climates, retractable awnings eliminate the need for expensive fabric take-down and reinstallation. This is necessary for permanent or welded frame awnings.

Convenient Operation

Convenient pull up kits are available to retract the Sunbrero
